---

We have two individuals who worked for Ramelli as supervisors for many years that signed affidavits stating that they used to dump the recycling materials at their yard and then reload it into the trash truck so that the landfill wouldn't see all the materials coming out when they would dump it on the Kenner taxpayers bill.

I will also email you the recording of one of the employees who approved the recording with me and my attorney telling us what they used to do.

If you would like a copy of the affidavit I will send them to you.

## **Ramelli Waste, stole tax payers money for recycling by dumping The recycling at River Birch landfill instead of a recycling facility.**

He will not produce recipes even though his contract calls for it monthly & the city has asked multiple times in writing.

Approximately 500,000 a year paid by the city of Kenner's taxpayers for recycling

Plus additional cost on the city of Kenner's taxpayers Landfill bill for not bringing it to recycling facility

Approximately 120,000 a year additional in Landfill bills that he was supposed to pay for by bringing it to the recycling center.

The total over four years is approximately **2.8 million** that the taxpayers paid but never had one thing recycled.
